

## 2008 COLORS FOR YOUR HOME

Home is no longer a place just for living in, but for considering how we live and engage with the outside world. The colors that reflect this sense of space are captured in these three palettes: Modern Tranquility, Organic Comfort, and Pure Opulence.

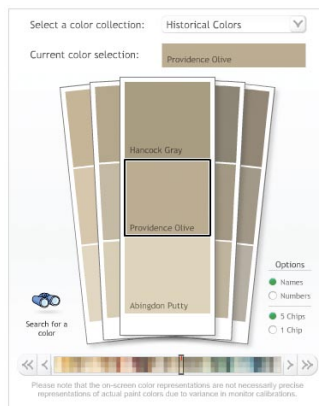

### Modern Tranquility

Home is an oasis of renewal. Haven, sanctuary, refuge - home is a wellspring of replenishment, a soothing respite from modern day clamor. A gossamer palette of hushed neutral hues evokes a sense of spaciousness with its quiet suggestion of color.

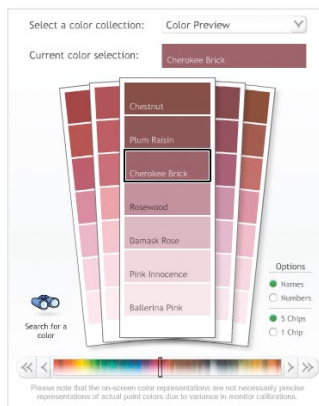

### Organic Comfort

The repetitive cycle of nature comforts through its rhythmic essence. This color palette is a celebration of nature's own; earthen hues with golden, sunlit undertones, deep, rich bark with fresh sprigs of green peppered throughout.

### Pure Opulence

Deep within the earth's core lay the elements for some of its most vibrant palettes. Rich, mineral hues polished to gem-like brilliance. These are colors that make a statement, whether tucked in a wall niche or announcing their presence in a grand entrance.
